Lucrearea de Laborator#4

Mobile Aplication

Autor: Madiudin Radu

lector asistent: Gojin Victor

Lucrare de laborator Nr.4

1 Scopul lucrarii de laborator

 Realizarea enei simple aplicatii Mobile, testarea acesteia pe un emulator si testrea pe dispozitivul mobil propriu

2 Objective

– Realizarea conexiunii calculatorului cu deviceul mobil , si anume IDE-uli Android Studio cu deviceul de care dispunem,cu ajutorul utilizarii Developers Mode existent in dispozitivele noastre android

3 Implimentarea lucrarii de laborator

3.1 Sarcini si Obiective

- Realizarea unui aplicatii/joc mobile
- Programul trebuie sa fiecross-platform,si trebuie sa reprezinte o aplicatie generalizata;

3.2 Implimentare

In aceasta lucrare am inceput de la instalarea unui compilator. Pentru crearea acestei aplicatii am folosit Android Studio, am folosit sistemul de operatie cel mai larg raspindit si anume Marshmellow, am testat aplicatia folosind emulatorul inscris.

3.3 Listing Program(main method):

```
package com.example.hiruine.lab 4;
```

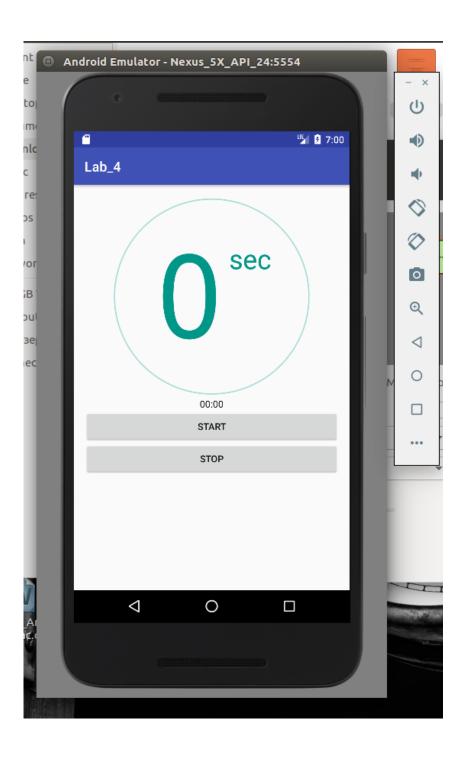

```
mport android.os.SystemClock;
mport android.support.v7.app.AppCompatActivity;
mport android.os.Bundle;
mport android.view.View;
mport android.widget.Button;
mport android.widget.Chronometer;
mport java.util.Timer;
mport java.util.TimerTask;
mport at.grabner.circleprogress.CircleProgressView;
mport at.grabner.circleprogress.TextMode;
public class MainActivity extends AppCompatActivity {
   CircleProgressView circleProgressView;
   Button btnStart, btnStop;
   Chronometer chronometer;
   long time = 0;
   StopWatch s = new StopWatch();
   @Override
   protected void onCreate(Bundle savedInstanceState) {
```

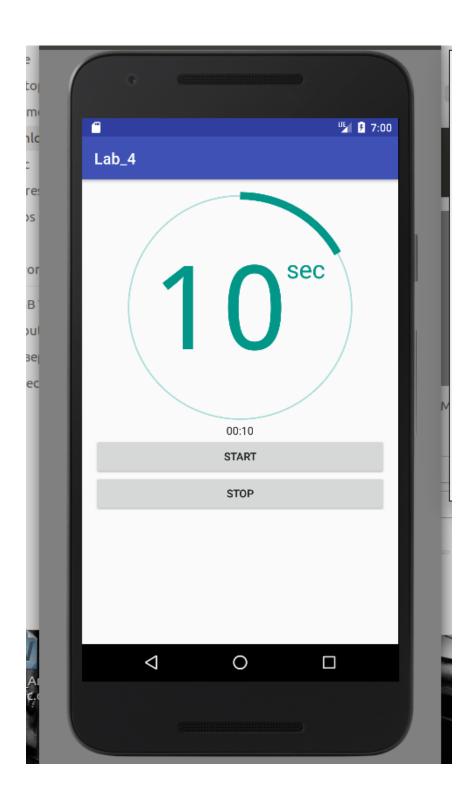

```
super.onCreate(savedInstanceState);
    setContentView(R.layout.activity main);
    circleProgressView = (CircleProgressView)findViewById(R.id.circleProgressView);
    btnStart = (Button)findViewById(R.id.btnStart);
    btnStop = (Button)findViewById(R.id.btnStop);
    chronometer = (Chronometer)findViewById(R.id.chronometer);
    circleProgressView.setTextMode(TextMode.TEXT.VALUE);
    btnStart.setOnClickListener(new View.OnClickListener(){
        @Override
        public void onClick(View view) {
             chronometer.setBase(SystemClock.elapsedRealtime()+time);
             chronometer.start();
             s.starCount();
    });
    btnStop.setOnClickListener(new View.OnClickListener(){
        @Override
        public void onClick(View view) {
             time = chronometer.getBase()-SystemClock.elapsedRealtime();
             chronometer.stop();
             s.stopCount();
    });
class StopWatch{
    private Timer timer;
    private int progressValue = -1;
    public void starCount(){
        timer = new Timer();
        timer.schedule(new TimerTask() {
             @Override
             public void run() {
                 progressValue++;
                 circleProgressView.setValue(progressValue);
                 if(progressValue == 59)
                      progressValue = -1;
        },0,1000);//1 second
    public void stopCount(){
        timer.cancel();
```

activity_main .xml

```
<?xml version="1.0" encoding="utf-8"?>
<LinearLayout xmlns:android="http://schemas.android.com/apk/res/android"</p>
    xmlns:CircleProgressView="http://schemas.android.com/apk/res-auto"
    xmlns:tools="http://schemas.android.com/tools"
    android:orientation="vertical"
    android:layout width="match parent"
    android:layout height="match parent"
    android:paddingBottom="16dp"
    android:paddingLeft="16dp"
    android:paddingRight="16dp"
    android:paddingTop="16dp"
    tools:context="com.example.hiruine.lab_4.MainActivity">
    <at.grabner.circleprogress.CircleProgressView
        android:id="@+id/circleProgressView"
        android:layout gravity="center horizontal"
        android:layout height="300dp"
        android:layout width="300dp"
        CircleProgressView:cpv value="0"
        CircleProgressView:cpv maxValue="59"
        CircleProgressView:cpv barWidth="10dp"
        CircleProgressView:cpv rimWidth="2dp"
        CircleProgressView:cpv contourSize="0dp"
        CircleProgressView:cpv autoTextSize="true"
        CircleProgressView:cpv seekMode="true"
        CircleProgressView:cpv unit="sec"
        CircleProgressView:cpv unitPosition="right top"
        CircleProgressView:cpv unitScale="1"
        CircleProgressView:cpv textScale="1"
        CircleProgressView:cpv showUnit="true"
        CircleProgressView:cpv autoTextColor="@color/circleProgressViewTextColor"
        />
    <Chronometer
        android:id="@+id/chronometer"
        android:layout gravity="center horizontal"
        android:layout width="wrap content"
        android:layout height="wrap content" />
    <Button
        android:id="@+id/btnStart"
        android:text="Start"
        android:layout width="match parent"
        android:layout height="wrap content" />
    <Button
        android:id="@+id/btnStop"
        android:text="Stop"
        android:layout width="match parent"
        android:layout height="wrap content" />
</LinearLayout>
```

Rularea aplicatiei pe Virtual Device Emulator

Concluzie

In aceasta lucrare am creat o aplicatie Android folosind IDE Android Studio, si limbajel de programare Java. Aplicatia este un cronometru, fiind accesibila pentru 40 la suta din devicurile Android existente.
